Brayo — Draft Review

Ibucap Kenya Hustler · Scene-by-scene analysis · 2026-07-02

Duration 28s (brief: 15s)	**Scenes** 9	**Character** Brayo — boda boda rider	**Status** Draft — revisions required

VERDICT

The concept is solid — Brayo is the right character, the Hustler archetype is fully realised, and the pain-to-relief arc is emotionally clean. Three issues need fixing before this goes to production: it runs almost double the brief duration, a 3D animation insert breaks the documentary realism rule, and the packshot palette reads NG/GH orange rather than KE azure. None of these are story problems — they're execution flags. Fix these and this is a strong first video.

WHAT WORKS

✓ Character	Brayo the boda boda rider is perfect Hustler casting. Working man, always moving, someone depending on him. The female passenger in Scene 3 adds stakes without adding dialogue — he can't stop, someone else needs him to keep going.
✓ Pain moment	Scene 4 shoulder pain with animated electric effect is clear and visceral. Lands the "three in one" pain claim without explanation.
✓ Product pickup	Scene 5 — pulls over, takes the capsule, water already in the holder. Believable and real. No pharmacy. No doctor. Pure compliant storytelling.
✓ The arc	Hustle interrupted → Ibucap → back on the road. The Hustler brief in three beats. Structurally this is right.
✓ VO line	"Always with you to beat pain" — authentic Nairobi energy. Keep this.

FIX BEFORE PRODUCTION

✗ Duration	28 seconds. Brief is 15 seconds. This is the group feedback on length — confirmed here. Cut Scenes 6 (3D animation) and tighten Scenes 7–8 to a single beat. Target: trim to 15–18s maximum.
✗ 3D capsule (Scene 6)	Floating animated capsule on a gradient background breaks the documentary realism rule entirely. Real people, real moments — no CGI inserts. Replace with a tight live-action product pickup or cut directly to Scene 7 (relief).

✗ Packshot palette	End card shows orange oval — that's NG/GH. Kenya runs azure #1E86D6. Brief is explicit. The packshot needs to be rebuilt with the KE colour system before this ships.

WATCH

■ End card logo	Scene 9 shows a second logo/brand mark appearing after the Ibucap packshot. Check whether this is a watermark or a production error — should not be in the final cut.
■ VO pacing	VO is front-loaded. Consider letting Scenes 1–3 run silent — the Hustler character sells himself without narration.

SCENE LOG

SCN	TIME	LABEL	NOTE
01	0:00–0:02	Opening Hook	✓ Strong. Brayo on the boda, smile, city energy. Keep.
02	0:02–0:04	Traffic weave	✓ Good movement. Could trim 1s.
03	0:04–0:05	Passenger	✓ Smart. Stakes established silently. Keep.
04	0:05–0:08	Pain	✓ Clear and compliant. Electric effect works. Keep.
05	0:08–0:11	Product pickup	✓ Natural. Best product shot in the film. Keep.
06	0:11–0:15	3D capsule	✗ Cut. Breaks realism. Costs 4 seconds we don't have.
07	0:15–0:17	Relief	✓ Merge with Scene 8. One beat, not two.
08	0:17–0:21	Celebration	■ Trim to 2s. Energy is right but runs long.
09	0:21–0:28	Packshot	✗ Rebuild in KE azure. Check second logo. Tighten to 5s.
